

FORUM3: ARCHITECT 21: SUSTAINABILITY & THE EXPANDING ROLE OF THE ARCHITECT

Held on the 1st of June our SAF3 was presented by Dr. Adil Sharaq Eldin associate professor at Kent State University USA. Dr. Sharaq presented his ideas about sustainability and its relationship with our habits and daily lives. The presentation then continued the idea of sustainability and introduced the role architects can play in this important process. Dr. Sharaq used different case studies to highlight the positive change architects can make in the community and the vision he sees for the future role of architects.

An interesting discussion took place as many members of the audience discussed and shared their thoughts and ideas with the Dr. Sharaq. In addition to the forum a 3 day workshop was organized in association with the University of Khartoum and taught by Dr. Sharaq.
